# MTHE AMERICAN MATHEMATICAL MONTHLY

Volume 106, Number 3

March 1999

Junpei Sekino	<i>n</i> -Ellipses and the Minimum Distance Sum Problem	193
Arcadii Z. Grinshpan	The Bieberbach Conjecture and Milin's Functionals	203
Dimitris A. Sardelis Theodoros M. Valahas	Decision Making: A Golden Rule	215
Vilmos Totik	A Tale of Two Integrals	227
Jaume Paradís Pelegrí Viader Lluís Bibiloni	A Mathematical Excursion: From the Three-Door Problem to a Cantor-Type Set	241
<hr/>		
<b>NOTES</b>		
Poh Wah Awyong	An Inequality Relating the Circumradius and Diameter of Two-Dimensional Lattice-Point-Free Convex Bodies	252
Sherman K. Stein	Cutting a Polyomino into Triangles of Equal Areas	255
William Staton	A Short Proof of Turán's Theorem	257
Sung Soo Kim	A Characterization of the Set of Points of Continuity of a Real Function	258
<b>THE EVOLUTION OF . . .</b>		
I. G. Bashmakova G. S. Smirnova	The Literal Calculus of Viète and Descartes	260
<b>PROBLEMS AND SOLUTIONS</b>		264
<b>REVIEWS</b>		
Joseph H. Silverman	<i>An Accompaniment to Higher Mathematics.</i> By George R. Exner	272
	<i>Journey Into Mathematics: An Introduction to Proofs.</i> By Joseph Rotman	272
	<i>Mathematical Thinking: Problem Solving and Proofs.</i> By John P. D'Angelo and Douglas B. West	272
John Meier Trisha Thorne	<i>The Social Life of Numbers: A Quechua Ontology of Numbers and Philosophy of Arithmetic.</i> By Gary Urton	275
<b>TELEGRAPHIC REVIEWS</b>		280
<b>EDITOR'S ENDNOTES</b>		284

## NOTICE TO AUTHORS

The MONTHLY publishes articles, as well as notes and other features, about mathematics and the profession. Its readers span a broad spectrum of mathematical interests, and include professional mathematicians as well as students of mathematics at all collegiate levels. Authors are invited to submit articles and notes that bring interesting mathematical ideas to a wide audience of MONTHLY readers.

The MONTHLY's readers expect a high standard of exposition; they expect articles to inform, stimulate, challenge, enlighten, and even entertain. MONTHLY articles are meant to be read, enjoyed, and discussed, rather than just archived. Articles may be expositions of old or new results, historical or biographical essays, speculations or definitive treatments, broad developments, or explorations of a single application. Novelty and generality are far less important than clarity of exposition and broad appeal. Appropriate figures, diagrams, and photographs are encouraged.

Notes are short, sharply focussed, and possibly informal. They are often gems that provide a new proof of an old theorem, a novel presentation of a familiar theme, or a lively discussion of a single issue.

Articles and Notes should be sent to the Editor:

ROGER A. HORN  
1515 Mineral Square, Room 142  
University of Utah  
Salt Lake City, UT 84112

Please send your email address and 3 copies of the complete manuscript (including all figures with captions and lettering), typewritten on only one side of the paper. In addition, send one original copy of all figures without lettering, drawn carefully in black ink on separate sheets of paper.

Letters to the Editor on any topic are invited; please send to the MONTHLY's Utah office. Comments, criticisms, and suggestions for making the MONTHLY more lively, entertaining, and informative are welcome.

See the MONTHLY section of MAA Online for current information such as contents of issues and descriptive summaries of forthcoming articles:

<http://www.maa.org/>

Proposed problems or solutions should be sent to:

DANIEL ULLMAN, MONTHLY Problems  
Department of Mathematics  
The George Washington University  
2201 G Street, NW, Room 428A  
Washington, DC 20052

Please send 2 copies of all problems/solutions material, typewritten on only one side of the paper.
