

INDEX

- altimeters (*Cont.*):
friction error, 33
hysteresis, 34
Kollsman Windows, setting the altimeter, 31
mechanical error, 34
misreading the altimeter, 31
preflight inspection, 38
scale error, 33
setting the altimeter, 31
stuck or corroded altimeters, 34
three-pointer altimeters, 31, **32**, 31
- aluminum corrosion, 6
- ammeters, 173, **173**, 187–188
- amp-hours, battery life, 154
- amphibious landing gear system, **221**
- amps, 154
- angle of attack, propellers, 202
- annual inspections, 62, 110
- antennas
ADF frequencies, 25
dirt on antenna, 26
distance measuring equipment (DME), 25
emergency locator transmitter (ELT), 25
frequencies accessible to antenna, 24–25
global positioning system (GPS), 25
LORAN frequencies, 25
marker beacon frequencies, 25
orientation of antenna, 24–25
preflight inspection, 23–26
radio frequencies, 25
size of antenna, 24–25
transponders, 25
ultra high frequency (UHF), 25
very high frequency (VHF), 25
VOR/LOC frequencies, 25
- anticollision lights, 10–12, **11**
- attitude indicators, 39–41, **40**
acceleration/deceleration errors, 40–41
bank-and-pitch errors, 40
cross-checking indicators for safety, 51
errors and problems, 40
errors, acceptable ranges, 51
gyroscope within, 39–40
preflight inspection, 39–41, 45, 47
setting or caging the gyro, 40
- attrition, 2, 4
- auto-ignition, 5
- automatic direction finder (ADF), 25
- aviation gasoline (avgas), 129
- avionics bus, electrical system, 177–178
- balanced propellers, 213
- batteries, 153, 154–168, 181
adding water to battery, 163
ammeters, 173, **173**
charge state, 157
corrosion, 7
electrolytes, 157, 164
emergency locator transmitter (ELT), 22–23
explosion of batteries, 158
installation, 161, 163
lead-acid batteries, 154–164, 191–192, 196–198
load shedding, 173, 184–185, 188–191
nickel-cadmium (NiCd) batteries, 164–168, **165**, 192–194, 199
rating system, NiCd batteries, 165, 168
reversed polarity, explosion, 158
specific gravity (SPGR), 157–161, 162, 163
temperature vs. performance, 157–161, 162, 163
- Beech Baron B55 fuel system, **133**
- Bendix drive for starter motor, 183–184
- bird strikes, transparency (window) strength, 16
- blade angle, propellers, 202, **209**
- boosting, turbocharger systems, 146
- boots, de-icing systems, 262–266
- borescopes, 111
- bottom dead center (BDC), 79, 87
- Bourdon tube temperature measurement, 96
- brake fluid, 234–235, 238
- brakes, 229–238, **231**, 275, **276**
- build-and-fade signals, ELT, 23, **24**
- bus, electrical, 176–178
- cabling, airframe inspection, 4
- calibrated airspeed (CAS), 29–30
- camber, propellers, 202
- carbon monoxide, 5, 241
- carburetor heat, 82, 108
- carburetors, 79, 82, 97, 137, 138–139
- cavitation, pumps, hydraulic systems, 278
- centrifugal force, propellers, 215
- Cessna TU206G turbocharger, **145**
- charge state, batteries, 157
