

- engines (*Cont.*):
- compression test, 111
  - connecting rods, 80
  - cooling properties of oil, 116, 121
  - cooling systems, 5, 82–87, 109–110, 112–113
    - air cooling, 82–83
    - airflow cooling engine, **85**
    - cowl flaps, **81**, 83, **84**, 86–87
    - cylinder head temperature (CHT)
      - gauges, 5, 96, 84–85, 100, **100**, 109–110, 147–148
    - detonation problems, 85–87, 109, 130
    - exhaust gas temperature (EGT)
      - gauges, 82, 84, 96–98, **97**, 147–148
    - heat build up during operational phases, 86
    - heat damage, 84
    - heat problems, turbocharger systems, 147–148
    - preflight inspection, 106
    - preignition problems, 85–87, 90–91, 109
    - pressure (fluid) cooling, 83, **84**
    - velocity (air) cooling, 82–83
  - cowl flap, **81**, 83, **84**, 86–87
  - cracks in crankcase/cylinder, 64–65
  - crankcase, 64–65
  - crankshaft, **66**, 80
  - cruise settings, 82
  - cycle of engine operation, 80
  - cylinder head temperature (CHT)
    - gauges, 5, 96, 84–85, 100, **100**, 109–110, 147–148
  - cylinders, 79, 80, 97, 111, 144–145
  - descent/landing settings, 82
  - detonation problems, 85–87, 109, 130
  - efficiency of engine, 85
  - exchange program, 67
  - exhaust gas temperature (EGT) gauges, 82, 84, 96–98, **97**, 147–148
  - exhaust manifold, 80
  - exhaust stroke, 80, 87, 144
  - FAA certified shops, 67
  - fuel flowmeter, 104–105, **105**
  - fuel injectors, 82, 108
  - fuel quality, 108
  - fuel quantity indicator, 104, 106
  - fuel systems (*see* fuel systems)
  - fuel-air mixture, 79, 81–82, 97–98, 108, 130, 139, 143, 144–145, 147, 148
- engines (*Cont.*):
- gapping spark plugs, 92–93
  - gaskets, seals, o-rings, 110
  - graphic engine monitors, 98, **99**
  - heat damage, 84
  - heat problems, turbocharger systems, 147–148
  - historical development of aircraft engines, 77, **78**, **79**
  - icing of carburetor, 82
  - idling, 82, 108
  - ignition systems, 80, 87–94
    - advance, 89
    - gapping spark plugs, 92–93
    - magnetos, 80, 87, 88–89, **88**, 106–108, 112, 153
    - p-leads, magnetos, 89, 106
    - preignition problems, 85–87, 90–91, 109
    - spark plugs, 80, 87, 90–94, **91**, **92**, **94**, 110, 122
    - timing, 89
    - unintentional starting, magneto safety, 88–89
  - induction fires, 5
  - inspections, 110
  - intake manifold, 79
  - intake stroke, 79, 80, 87, 144
  - intake valves, 79
  - knocking (*see* detonation problems)
  - leaks and drips, 2, 105, 122
  - lubricating systems (*see* lubricating systems)
  - Lycoming horizontally opposed engine, **79**
  - magnetos, 80, 87, 88–89, **88**, 106–108, 112, 153
  - manifold pressure (m.p.) gauges, 101–102, 146
  - oil changes, 110, 111, 125–126
  - oil consumption, 108, 112
  - oil pressure gauges, 102–103, 105, 118, 121
  - oil quantity, 105
  - oil temperature, 5, 96, 101
  - oil viscosity, 110, 111, 115–116, 121–122, 124
  - overboosting the engine, 101–102, 146, 150
  - overhaul, 63–67, **63**, 112
  - pistons, 79, 80, 111, 144–145
  - power stroke, 80, 87, 144
