

Acknowledgments

This second edition is a complete revision and restructuring, so there are many people to whom I am indebted for their assistance. I must warmly thank Rich Mileham, airworthiness inspector, Great Lakes Region of the FAA. Rich, while an inspector at the Chicago-area DuPage FSDO, thought it didn't make much sense that pilots had accident prevention counselors but mechanics didn't. Tilling sacred ground, Rich was generous enough to appoint me to the first group of FAA airworthiness accident prevention counselors. Over the following years as we traveled throughout the area conducting safety seminars for maintenance personnel, I came to have an enormous respect for this quiet, innovative Fed with a sense of humor. When, in the course of having this revised edition written, a couple of reviewers fell through, Rich filled in with lightninglike turnaround time and some excellent input. Rich Mileham is the quintessential public servant and a good friend.

I would also like to thank my very good friend Rudy Frasca, president, Frasca International, Inc. for his long-time support of my writing efforts and for making his wide array of aviation facilities available in my quest to add new photographs to this book. I would especially like to thank Tom Frasca, manager, Frasca Air Services for taking so much of his time to help me take photographs for this edition and Dale Rapp of the Frasca Air Museum for his assistance and historical knowledge.

For their assistance in providing fresh illustrations and photographs, I would also like to thank David Henry, chief pilot/engineer, Aerospace Systems & Technologies, Inc.; Jennifer Whitlow, manager marketing communication, Cessna Aircraft Company; Bruce Rivard, vice president, Lake Aircraft, Inc.; and Kimberly V. Wheeler, manager of marketing, The New Piper Aircraft Corporation. When other, giant manufacturers either weren't interested or couldn't respond with turnaround times of less than several months because of restrictive legal departments, AS/T, Cessna, Lake, and Piper were shining lights.
