

Standard Classification System for Chemicals According to Functional Groups¹

This standard is issued under the fixed designation F 1186; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This standard provides a classification system for chemical compounds whereby chemicals are assigned a 3-digit code based primarily on chemical class.² Poly-functional compounds should be classified by all applicable code numbers associated with their component functional groups.

2. Significance and Use

2.1 In many situations where chemicals are interacting with other chemicals or materials, the interaction is strongly dependent and often correlated with the functional group(s) present. These interactions include chemical reaction, dissolution, and swelling/permeation of polymeric materials. For this reason, it is useful to have a standard means for classifying chemicals.

2.2 One application for this classification system is in the selection of chemical protective clothing based on the chemical resistance of the clothing materials.^{3,4,5} Chemical resistance

data are available for only a very small fraction of the chemicals for which protective clothing is used. However, for chemicals for which no data are available, a knowledge of the chemical class sometimes can give insight into the resistance of a prospective clothing material.

NOTE 1—The present state of knowledge precludes reliable estimates from chemical class alone.

2.3 The classification system also facilitates the development of predictive methodology by researchers in a variety of fields, in addition to protective clothing.

3. Terminology

3.1 Definitions:

3.1.1 *functional group*—the atom or group of atoms that defines the chemical class of a particular family of organic compounds and, at the same time, determines their properties.

4. Basis of Classification

4.1 Three-digit numbers were assigned to each class. The major classes generally were a multiple of 10 (printed in bold type), with subclasses numbered between.

4.2 Subcommittee F23.30 has jurisdiction for designating new classes. Proposals should be made to that group. The list will be updated periodically through the ASTM balloting process as needed; interim lists will be made immediately available from the subcommittee.

4.3 See Annex A1 for the classification system.

5. Keywords

5.1 chemical classification; chemical resistance; chemicals; clothing; protective; groups; functional

¹ This classification system is under the jurisdiction of ASTM Committee F23 on Protective Clothing and is the direct responsibility of Subcommittee F23.30 on Chemicals.

Current edition approved July 10, 2003. Published September 2003. Originally approved in 1988. Last previous edition approved in 1999 as F 1186 – 99.

² Classification in this guide is based on assignment of 3-digit codes, originally found in the *Guidelines for the Selection of Chemical Protective Clothing*, 3rd Ed. (Vols I and II), Schwoppe et al. NTIS Accession Nos. ADA179 516 and ADA179 164, to the groups listed in the Functional Group Index, Kodak Laboratory Chemicals, Kodak Laboratory Products Catalog No. 53, 1987–1988, p 1f–30f.

³ *Chemical Protective Clothing Permeation and Degradation Database*, K. Forsberg et al., Lewis Publisher, CRC Press Inc., 2000 Corporate Blvd., N.W., Boca Raton, FL 33431-9964.

⁴ *Guidelines for the Selection of Chemical Protective Clothing*, Johnson et al., U.S. Dept. of Energy Report DE-02357T, 1991.

ANNEX
(Mandatory Information)
A1. CLASSIFICATION OF CHEMICALS/CHEMICAL CLASS NUMBERS

| | | | |
|------------|--|------------|---|
| CLASS | CHEMICAL CLASS/SUBCLASS NAME | 231 | Ortho Esters |
| 100 | Acids Carboxylic | 232 | Carbonates |
| | | 233 | Carbamates and Others |
| 102 | Aliphatic and Alicyclic, Unsubstituted | | |
| 103 | Aliphatic and Alicyclic, Substituted | 240 | Ethers |
| 104 | Aliphatic and Alicyclic, Polybasic | | |
| 105 | Aromatic, Benzoic | 241 | Aliphatic and Alicyclic |
| 106 | Aromatic, Others | 242 | Aromatic |
| | | 243 | Alkyl-Aryl |
| 110 | Acid Halides, Carboxylic | 244 | Ketals, Acetals |
| | | 245 | Glycol Ethers |
| | | 246 | Vinyllic |
| 111 | Aliphatic and Alicyclic | | |
| 112 | Aromatic | 260 | Halogen Compounds |
| 113 | Chloroformates | | |
| 120 | Aldehydes | 261 | Aliphatic and Alicyclic |
| | | 263 | Aromatic |
| 121 | Aliphatic and Alicyclic | 264 | Vinyllic |
| 122 | Aromatic | 265 | Allylic |
| | | 266 | Benzylic |
| 130 | Amides | 270 | Heterocyclic Compounds |
| | | | |
| 132 | Aliphatic and Alicyclic | 271 | Nitrogen, Pyridines |
| 133 | Aromatic | 274 | Nitrogen, Others |
| 134 | Acetanilides | 275 | Oxygen, Epoxides |
| 135 | Acrylamides | 276 | Carbohydrates |
| 137 | Carbamides and Guanidines | 277 | Oxygen, Furans |
| | | 278 | Oxygen, Others |
| 140 | Amines | 279 | Sulfur |
| | | | |
| 141 | Aliphatic and Alicyclic, Primary | 280 | Hydrazines |
| 142 | Aliphatic and Alicyclic, Secondary | | |
| 143 | Aliphatic and Alicyclic, Tertiary | 290 | Hydrocarbons |
| 145 | Aromatic, Primary | | |
| 146 | Aromatic, Secondary and Tertiary | 291 | Aliphatic and Alicyclic, Saturated |
| 147 | Alkyl-Aryl, Monoamines | 292 | Aromatic |
| 148 | Aliphatic and Alicyclic Polyamines | 293 | Aromatic Polynuclear |
| 149 | Aromatic Polyamines | 294 | Aliphatic and Alicyclic, Unsaturated |
| | | 295 | Acetylenes |
| 150 | Hydroxylamines and Ketoximes | 296 | Polyenes and Poly-yenes |
| | | | |
| 160 | Anhydrides | 300 | Peroxides |
| | | | |
| 161 | Aliphatic and Alicyclic | 310 | Hydroxylic Compounds |
| 162 | Aromatic | | |
| 170 | Azo/Azox4 Compounds | 311 | Aliphatic and Alicyclic, Primary |
| | | 312 | Aliphatic and Alicyclic, Secondary |
| 210 | Isocyanates | 313 | Aliphatic and Alicyclic, Tertiary |
| | | 314 | Aliphatic and Alicyclic, Polyols |
| 211 | Aliphatic and Alicyclic | 315 | Aliphatic and Alicyclic, Substituted |
| 212 | Aromatic | 316 | Phenols |
| | | 317 | Naphthols |
| 220 | Esters Carboxylic | 318 | Aromatic, Others |
| | | 330 | Elements |
| 221 | Formates | | |
| 222 | Acetates | 340 | Inorganic Salts and Inorganic Salt Solutions |
| 223 | Acrylates and Methacrylates | | |
| 224 | Aliphatic, Others | 345 | Inorganic Cyano Compounds |
| 225 | Lactones | | |
| 226 | Benzoates and Phthalates | 350 | Inorganic Gases and Vapors |
| 227 | Aromatic, Others | | |
| 230 | Esters Non-Carboxylic | 360 | Inorganic Acid Halides |

| | | | |
|------------|-------------------------------------|------------|---|
| 365 | Inorganic Acid Oxides | | |
| 370 | Inorganic Acids | 470 | Organo-Metallic Compounds |
| 380 | Inorganic Bases | 480 | Organo-Silicon Compounds |
| 390 | Ketones | 500 | Sulfur Compounds |
| 391 | Aliphatic and Alicyclic | 501 | Thiols |
| 392 | Aromatic | 502 | Sulfides and Disulfides |
| 393 | Alkyl-Aryl | 503 | Sulfones and Sulfoxides |
| | | 504 | Sulfonic Acids |
| 410 | Quinones | 505 | Sulfonyl Chlorides |
| | | 506 | Sulfonamides |
| 430 | Nitriles | 507 | Sulfonates, Sulfates, and Sulfites |
| 431 | Aliphatic and Alicyclic | 508 | Thiones |
| 432 | Aromatic | 509 | Others |
| | | 510 | Nitrates and Nitrites |
| 440 | Nitro Compounds | 520 | Ureas |
| 441 | Unsubstituted | | |
| 442 | Substituted | 530 | Zwitterions |
| 450 | Nitroso Compounds | 550 | Organic Salts and Organic Salt Solutions |
| 460 | Organo-Phosphorus Compounds | 590 | Miscellaneous |
| 461 | Phosphines | | |
| 462 | Derivates of phosphorus-based acids | | |

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.
