

# Financial Toolbox 2.2

## Release Notes

---

<b>New Features</b> . . . . .	1-2
<b>Obsolete BDT Functions</b> . . . . .	1-3

## New Features

This section introduces the new features and enhancements added in the Financial Toolbox 2.2 since Version 2.1.3 (Release 12.1).

---

**Note** The Financial Toolbox 2.2 was initially released in Web-downloadable form after Release 12.1 was released, but before Release 13. There are no changes between the post-Release 12.1 version of the Financial Toolbox 2.2 and the version shipped with Release 13.

---

## Obsolete BDT Functions

The functions `bdtbond` and `bdttrans` are obsolete, and their descriptions have been removed from the documentation. These functions have been replaced by BDT functions in the Financial Derivatives Toolbox. For compatibility purposes, the obsolete functions remain in the product. Type `help function_name` at the MATLAB command line for a description.
