# MATLAB COM Builder 1.0 Release Notes

---

**Introduction to MATLAB COM Builder . . . . . 1-2**

## Introduction to MATLAB COM Builder

---

**Note** The MATLAB COM Builder is a new product introduced in Release 13.

---

The MATLAB COM Builder 1.0 is an extension to the MATLAB Compiler that enables customers to automatically convert MATLAB applications to Common Object Model (COM) objects. Developers can do modeling and analysis in MATLAB and convert the models to ready-to-use COM objects. These objects can be immediately integrated with any COM-based application.
